LONI KUANG

Full Stack Web Developer Student

Former Registered Nurse pursuing a career in Software Engineering through a coding bootcamp. Adept at using HTML, CSS, JavaScript, Python, SQL, and other programming languages to produce clean code. I value teamwork, but also pride myself in being a highly motivated and inquisitive self-learner.

Portfolio

Full Stack Web Development Student — June 2021 - Present
Rithm School, San Francisco

- **Warbler Flask App**
Python | Flask | PostgreSQL | Jinja | Bcrypt

  Warbler is a mock Twitter clone where users can sign up/login, follow other users, be followed by other users, and create tweets called "warbles". I added features such as liking and unliking posts, only showing 100 most recent "warbles" from users that the user is following, and a functionality to edit the user's profile and change the existing password. Models and views are tested using unittest. | [Demo] | [Github]

- **Lunchly Express App**
JavaScript | Node | Express | PostgreSQL | Nunjucks

  Lunchly is a reservation system app built using fullstack JavaScript, with Express in the backend. The pg database is currently seeded with fake users. Reservations are listed on the homepage, with a search function that is case insensitive for first and/or last names. Each reservation can be edited and saved, with client and server-side form validation. | [Demo] | [Github]

Experience

Registered Nurse — Feb 2021 - June 2021
University of California, San Francisco

- collaborated with an interdisciplinary team to provide exceptional care to a variety of medical, surgical,, and oncology patients with acute and chronic conditions.
- Developed positive working relationships with physicians, nurses, and other medical staff

Registered Nurse — October 2015 - February 2021
VA Palo Alto Health Care Systems

- Improve unit and hospital safety standards by establishing unit-specific goals such as reducing falls and unit acquired pressure injuries, creating and implementing a behavior emergency response protocol, developing projects to improve patient satisfaction, and establishing unit-based Standards of Works
